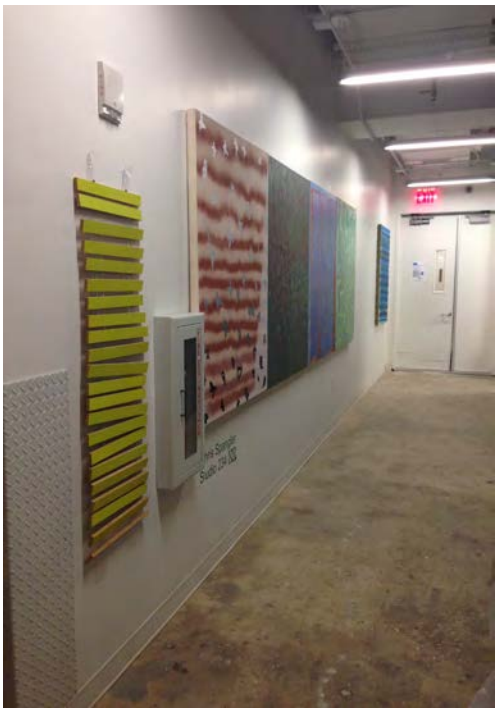
Guide For Keeping the Hallways Clear and Safe

Please review the DO's and DON'Ts of hallway upkeep and remove items or tidy areas that do not meet the standards:

DO stack items neatly, labeled, and within the boundary created by the pillars

DO organize your shelves neatly and place small items in containers

DO hang 2D art works on the wall

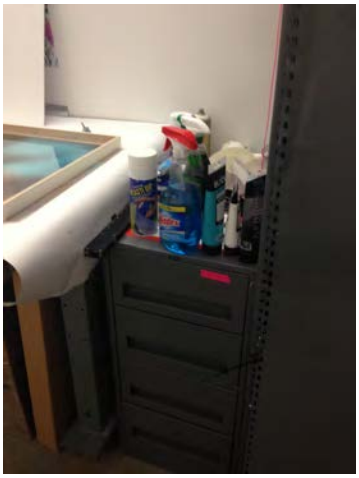


DON'T leave your shelves messy, disorganized or filled with many small items

OR areas around shelves...

The fire inspector does not see the value or the potential - it just looks like kindling to them

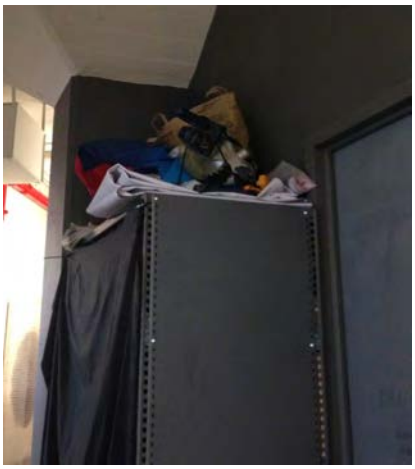
DON'T leave chemicals or solvents in view of passersby - they should be secured in metal cabinets and inside your studio



DON'T leave random construction materials in the hallway

DON'T leave items jutting out beyond the pillars

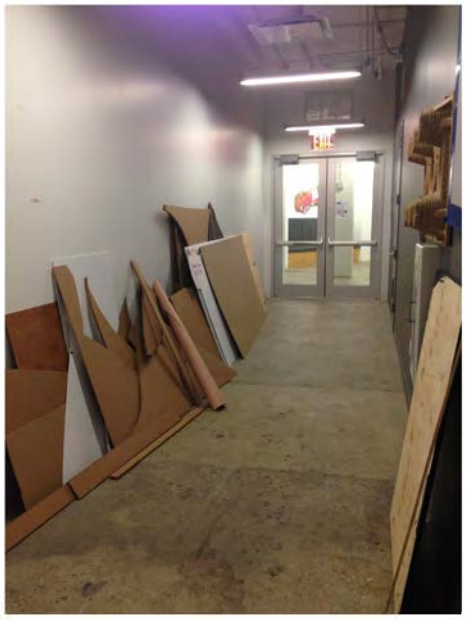
DON'T make precarious stacks up high on your shelves



DON'T store tables in the hallway

DON'T stack art work against outer walls

DON'T assume anyone else knows what this is (maybe it's art, maybe it's trash)

And please, DON'T do any of these


Multiple violations
of fire code,
too numerous to put
in one category
